revisão sistemática

plataforma PROSPERO

The screenshot shows the homepage of the PROSPERO website. At the top left is the NIHR logo (National Institute for Health Research). To the right, it says 'International prospective register of systematic reviews'. The word 'PROSPERO' is circled in green. Below the header is a navigation menu with links: Home, About PROSPERO, How to register, Service information, Search, Register, and Join. A large green banner with a pattern of dots contains the text 'Welcome to PROSPERO International prospective register of systematic reviews'. Below the banner, there is a section titled 'PROSPERO is fast-tracking registration of protocols related to COVID-19'. The text in this section states: 'PROSPERO accepts registrations for systematic reviews, rapid reviews and umbrella reviews. PROSPERO does not accept scoping reviews or literature scans. Sibling PROSPERO sites registers systematic reviews of human studies and systematic reviews of animal studies. Before registering a new systematic review, check PROSPERO and the resources on COVID-END to see whether a similar review already exists. If so, please do not duplicate without good reason. Your efforts may be much more useful if switched to a different topic. This will avoid research waste and contribute more effectively to tackling the pandemic. Shortcut for already registered reviews of human and animal studies relevant to Covid-19, tagged by research area'.

# O que é o prospero?

❖ É um banco de dados internacional utilizado para indexar protocolos de revisões sistemáticas (RSs).

# Por que submeter o protocolo?

❖ Ele evita a duplicidade de estudos e permite a comparação entre o **protocolo** e a **revisão sistemática** concluída.

# Quando submeter?

❖ Antes de iniciar sua RS faça uma busca para evitar duplicidade e garantir que seu estudo seja inédito. Após essa verificação é recomendável o preenchimento do protocolo no Prospero.

Welcome to **PROSPERO**  
International prospective register of systematic reviews

## PROSPERO is fast-tracking registration of protocols related to COVID-19

PROSPERO accepts registrations for systematic reviews, **rapid reviews** and umbrella reviews. PROSPERO **does not accept scoping reviews** or **literature scans**. Sibling PROSPERO sites registers systematic reviews of **human studies** and systematic reviews of **animal studies**.

Before registering a new systematic review, check **PROSPERO** and the resources on **COVID-END** to see whether a similar review already exists. If so, **please do not duplicate without good reason**. Your efforts may be much more useful if switched to a different topic. This will avoid research waste and contribute more effectively to tackling the pandemic.

[Need to join?](#)

1. Verificar se há estudo semelhante já cadastrado.
2. Registrar seu protocolo “Register a review”.

**Pesquise por: termos ou título do seu estudo**

We receive many emails enquiring about progress. As answering these takes time away from processing registrations, please email only if absolutely necessary. We are working hard to process registration requests as quickly as possible. **If your enquiry is related to a COVID-19 registration please add #COVID-19 to your subject line.**

If you do not already have a PROSPERO account, you will need to create one to register a review

### Register a review

Registering a review is quick and easy. Just follow these simple steps to register your review in PROSPERO

**2**

[Register your review now](#)

[Accessing and completing the registration form](#)

### Search PROSPERO

Search for PROSPERO registrations by entering words in the record or the registration number below

**1**

### Important notice

To allow the PROSPERO team to focus on COVID-19 and to avoid further delay, **during the pandemic all submissions that have been waiting for registration for more than 30 days and which pass a basic automated check will be published automatically.** The PROSPERO team will not check these submissions; this will be stated clearly on the published record. Records will be published exactly as submitted; therefore extra

## Escolha o tipo de estudo: “em animais” ou “em humanos”

**Step 2** Ensure that your review protocol is in its (near) final form and that no major changes are anticipated at this stage - e.g. if your protocol will be peer reviewed it will usually be sensible to wait until this is complete before registering.

**Step 3** Search PROSPERO to ensure that your review has not already been registered by another member of your team

**Step 4** Search PROSPERO to ensure that you are not unnecessarily duplicating a review that is being done by another team or has been registered previously

**Step 5** Start registering your review

**PESQUISA COM SERES HUMANOS**

**PESQUISA COM ANIMAIS**

Preferencialmente registre em “inglês”

Não utilizar a plataforma para preparar um curso, trabalho ou manual.

Para esses fins utilize o formulário PROSPERO – PDF

Para fins de aprendizado, você pode baixar e preencher o formulário PROSPERO como um documento PDF. Se você preencher o formulário on-line, salve-o em seu próprio espaço e NÃO ENVIE para publicação.

Is this a mini or partial review done for a training course or classwork or are you using the system to learn how to register?

PROSPERO does not have resources to process applications for reviews done only for training purposes. This includes mini reviews restricted to a subset of eligible studies, demonstrator reviews where a whole class does the same review, or any other projects that are less than full systematic reviews.

For learning purposes you may download and complete the PROSPERO form as a PDF document . If you do complete the form online, please save this in your own space and **do not SUBMIT it** for publication.

YES

NO

NO

Se não detectou semelhança, assinale a primeira opção: “**Não há revisões similares**”

**Please check PROSPERO for similar systematic reviews before proceeding**

Checking whether a similar review already exists should be one of the first steps taken in a systematic review.

Knowingly repeating an existing systematic review is not necessarily wrong, but to avoid research waste there should be a reason for doing this - for example if the new review will incorporate additional studies, use new or alternative methods of analysis, or have a different focus.

PROSPERO does not prevent registration of similar reviews. However, registrations are dated in PROSPERO and a journal could decide not to publish a review that has repeated an already registered review without justification.

If you find a similar review in PROSPERO, but are unsure if it is the same or if it will be completed and published, we suggest that you contact the author to find out before proceeding. Contact details can be found within the PROSPERO record.

**I have searched PROSPERO and...**

- There are no similar reviews
- There are similar or identical reviews but my review is needed.
- There are similar/identical reviews and I will not proceed with my planned review.

## Importante saber....

- Se você encontrar um estudo semelhante no PROSPERO, mas não tiver certeza da similaridade, ou se será concluído ou publicado, sugerimos que entre em contato com o autor antes de prosseguir com o seu protocolo.
- Você poderá ter dificuldade em submeter seu estudo a uma revista, caso tenha uma revisão semelhante já publicada.

Você precisa elaborar um protocolo antes de registrar na plataforma

Have you written a protocol?

PROSPERO registration captures key information about the design and conduct of a planned systematic review. It is not a full protocol. We strongly encourage you to write a full protocol before completing the PROSPERO registration form (although you may proceed without doing this).

YES

NO

**YES**

Responda a pergunta: “Mais de uma pessoa estará envolvida na revisão sistemática”

**Will more than one person be involved in the systematic review?**

We strongly recommend that you follow best practice and include more than one person in the review team. PROSPERO will not accept registrations unless there is more than one person conducting the review. You must include details of the other author(s) in the registration form.

YES

NO

**YES- NO**

**Do you intend to publish the results of your systematic review and/or make them publicly available when completed?**

PROSPERO aims to increase transparency and help prevent unintended duplication of effort. This requires that the results of systematic reviews should be made publicly available e.g. by publication in an academic journal, posting in a research repository or being made available on a permanent website. We therefore do not accept registrations from systematic reviews that will not be made available to others e.g. projects that are internal to an organization or company, or masters dissertations if it is known that these will not be shared.

YES

NO

## Você pretende publicar os resultados do seu estudo?

PROSPERO will not accept registrations unless there is more than one person conducting the review. You must include details of the other author(s) in the registration form.
